Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: On page 3 at line 14, "viableability" should be replaced with "viability."

Appropriate correction is required.

Claim Objections

Claim 24 is objected to because of the following informalities: Line 5 of the claim should state "coating the seafood with the solution having a concentration of sodium benzoate." Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 24 and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Frandsen, U.S. 2,622,031.

In regard to claim 24, Frandsen discloses a method of increasing the shelf life of seafood (column 1, lines 6-7) comprising providing a solution of water having a concentration of sodium benzoate of 0.11% (see table 5, experiment 10) and coating

Art Unit: 1761

the seafood with the solution, initially in the form of ice which then melts, and maintaining the coated seafood at a temperature just above freezing (column 2, lines 34-51).

In regard to claim 25, Frandsen discloses a method of increasing the shelf life of seafood (column 1, lines 6-7) comprising providing a solution of water having a concentration of sodium benzoate of 0.11% (see table 5, experiment 10), placing the seafood with the solution, freezing the solution in which the seafood has been placed, maintaining the frozen solution containing the seafood in a frozen state (column 2, lines 4-7), and inherently thawing the frozen solution containing the seafood prior to consumption.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gonthier et al., U.S. Patent 3,600,198, discloses the preservation of fish through the use of a solution containing sodium benzoate. Doyle, U.S. Patent 2,177,519, discloses the use of a solution containing sodium benzoate in the preservation of the color of meat.
